

Labeling Solutions

# Wrap-around Labeling Machine

This feature makes it particularly well-suited for applying long, low labels. Additionally, the machine offers the option to align labels with a prominent feature of the product.

- The wrap-around labeler's economical appeal lies in its compact design, which leverages standard components to meet the unique demands of various applications. For industries like healthcare, where rigorous qualification processes are paramount, the QKE version offers a fully equipped solution.
- This high-performance machine is particularly well-suited for the pharmaceutical industry, where stringent safety requirements must be met. Moreover, its versatility and range of solution-focused options make it an attractive choice for companies across multiple industries.

## Unwavering excellence, no exceptions

- This highly efficient labeling solution boasts unparalleled performance, with the capability to process up to 600 products per minute. The key to its success lies in the precision and reliability of its production, which is made possible by the innovative clocked rotary star design.
- This convertible system ensures accurate labeling with every rotation, making it an unbeatable choice for high-volume production.

## The compact, modular design

- To cater to the unique needs of individual users, machines can be assembled with precision and cost-effectiveness using standard components.
- Furthermore, labeling cylindrical products with one or two labels on the circumference can be achieved in a shorter timeframe and at a lower cost.

## A user-friendly, ergonomic design

- The cost-effectiveness of this labeling machine is further enhanced by its ability to quickly change formats and minimize downtime.
- Its reliability has earned it a spot in the production lines of several prominent international pharmaceutical companies across the globe.
- Moreover, the wrap-around labeling system prioritizes safety, ensuring a high level of protection in addition to its cost-saving benefits.

## Strong specialists

- With minimal effort, wrap-around labelers can be swiftly adapted to accommodate varying product formats.
- Moreover, the incorporation of control devices, including print presence, code control, and label presence, guarantees a secure and efficient working environment.

# Wrap-around labeling Machine

## Labeling type

Wrap-around labeling

## Product specifications

Cylindrical, stable

## Product dimensions

14.75 - 100 x 36 - 230 mm (D x H)

## Label dimensions

10 - 80 x 30 - 265 mm (B x L)

## Capacity

Up to 600 products per minute with continuously rotating star wheel

Up to 120 products per minute with clocked star wheel

## Power supply

220 V, 50 Hz, 1/3 Phase

## Compressed air supply

6 bars (optional)

## Printer

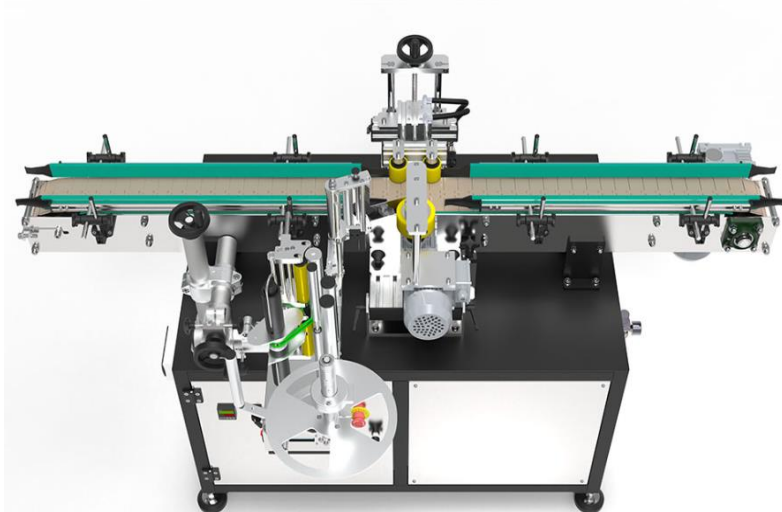

Various hot-foil, thermal transfer and laser printers (optional)

## Components

Control panel with 12" touchscreen, signal column, conveyor belt, side guides for products, infeed queue sensor, star wheel, applicator with digital position indicators for all mechanical adjustments, printer, print check, label presence check, product reject station, outfeed jam sensor, transparent machine guard, Siemens control, interface for remote maintenance

## Options

Rotary table, check or rejection of fallen products, code check, aligned wrap-around labeling, Allen-Bradley control, in-process control, data providing for batch report, audit trail, qualification
